FOR IMMEDIATE RELEASE

MEDIA STATEMENT

CLAN Calls for an End to Any Forced Displacement of Civilians in the West Bank

3 August 2026

The Citizen-Led Accountability Network (CLAN) expresses its deep concern over reports alleging that an increasing number of Palestinian communities in the West Bank are facing pressure, displacement, and eviction from their homes.

Civilians should never become victims of armed conflict. Women, children, the elderly, and other vulnerable groups have the right to live in safety, dignity, and with the protection guaranteed under international humanitarian law.

CLAN urges the international community not to remain silent in the face of any actions that may result in the forced displacement of civilians or undermine their fundamental human rights. Humanitarian principles must remain paramount, regardless of race, religion, nationality, or political affiliation.

We further call on all parties involved in the conflict to uphold their obligations under international humanitarian law, including the protection of civilians, ensuring unhindered humanitarian access, and refraining from actions that would further intensify the suffering of affected communities.

CLAN believes that lasting peace cannot be built through fear, forced displacement, or the suffering of civilians. Sustainable peace can only be achieved when human dignity is respected and the rights of every individual are protected.

We also call upon the United Nations (UN), the Organisation of Islamic Cooperation (OIC), ASEAN, and all nations committed to humanitarian principles to strengthen diplomatic efforts aimed at protecting civilians and ensuring that humanitarian assistance can reach those in need without obstruction.

Today, the world is witnessing the suffering of thousands of families who have lost their homes, livelihoods, and hopes for the future. History will remember not only those who committed atrocities, but also those who chose to remain silent.

CLAN firmly reiterates that human dignity must never be taken away. Civilians are not legitimate targets of war. Every human life carries equal value.

“Silence in the face of human suffering is never neutrality—it is a choice.”
